Quality carpets for the marine market

Marine Tuft was established in Queensland, Australia in 2005.

It has a purpose built manufacturing facility to cater specifically for the marine carpet industry; and with no day to day general domestic or commercial carpet production, they can be assured of producing the highest quality cut and loop pile tufted marine carpets.

Marine Tuft is a private company owned and operated by its directors whom have had some 25 years of carpet manufacturing experience, ensuring superior quality in every metre produced.

Marine Tuft products have been established to specifically cater for the quality marine grade internal/external carpeting market. Constructed from the highest quality UV treated fibres, coupled with marine grade Synthetic and Aquabac backing, Marine Tuft products are sure to stand up to most elements encountered in marine use including sunlight and moisture.

Marine Tuft offer:

- Plush Cut and Cut/Loop pile styling
- Soft Underfoot
- Easier to clean than conventional marine/needlepunch carpets
- Available in 2 & 4 metre widths to suit most installations
- High resistance to snagging from hooks and lures
- Can either be loose laid or adhered to the sub floor
- Constructed from the highest quality UV marine grade fibres and backing materials
- Mould and mildew resistant for ease of maintenance
- Sound absorption qualities

Marine Tuft carpets are suitable for commercial/recreational boating, caravans, RV's, automotive, transit, exhibition, domestic, patios, retail and shop fit.

Marten Masterpiece

The wait is over! Marten Yachts has launched one of the world's most anticipated performance cruisers - the stunning Marten 67.

This marks the beginning of a new era at the company. Based on the hugely successful hull and rig of the Marten 49, the 67 will undoubtedly prove itself on the race course and cruising on the ocean. Marten's meticulous attention to detail, hull construction, sailing capability, balance and strength remains the best in the business.

Marten 6701 features a radically designed interior by Ali Taya of Parallel Design New York, showcasing high-grade fixtures and fittings, innovative storage solutions and contemporary styling to cement Marten Yacht's position as the leader in the cruiser racer yacht market.

She boasts a voluminous interior and extensive headroom, making the saloon a spectacular space for relaxing or entertaining. With a U-shaped galley including two fridge units, comfortable seating and three large cabins, this yacht has a luxurious living space.

In true Marten style, the vessel has been hand crafted to produce a masterpiece that combines the latest in technology with premium quality finishes and exceptional performance.

With the 49s recent victory is the 2009 Giraglia Rolex Cup, one of Europe's most prestigious regattas, the new Marten 67 is yet to showcase her race-bred performance capabilities on the world racing scene.

being constructed and is due for delivery later in 2009. The next hull will be available for delivery in 2010.

Pioneering the evolution of carbon yacht construction, Marten Yachts are built to the highest standards and distinctive in character. The Marten range includes the Marten 49, Marten 67, Marten 72 and Marten 85.

The new Marten 67 aptly demonstrates the direction of Marten Yachts and some of the features of the luxurious Marten 85.

Panelec range to showcase at METS

Panelec will showcase its range of electrical and fascia panels on the AIMEX stand at this year's METS Amsterdam.

Maritimo 60 Fascia panel from Panelec

Managing Director, Gary Pacey said the company has been progressively increasing its Australian market share over the past 3 years and is now looking to attract additional business from export orders.

"Panelec designs and manufactures electrical and fascia panels for use in dash, helm and electrical power distribution applications," he said. "Our quality workmanship, innovative product features and fast prototype turnaround

have seen Panelec become a supplier of choice for manufacturers in the marine, automotive, industrial and RV fields."

Mr Pacey said the company's advanced manufacturing techniques not only ensure its products perform in the most demanding conditions, but they do it in style. "Our electrical power distribution panels are now widely used in the marine industry, where their unique design features make vessel manufacturing, assembly and installation tasks easier, more user friendly and aesthetically pleasing. Our dash and helm panels meet the high standards of some of Australia's most influential and highly regarded boat manufacturers," he said.

From design brief to prototype can be as little as three days. Panelec is a wholly owned subsidiary of Outback Marine Australia Pty Ltd. Visit www.panelec.com.au
